

Electrician Panel Construction

Are you a technical talent and do you enjoy working with electronics? Do you have experience in building control cabinets, control panels and wiring. Then we are looking for you! To strengthen our production department, we are looking for an enthusiastic electrical panel construction engineer.

The Job Description

We produce electronic parts for sea vessels. For various technical production activities we are looking for a full-time colleague. You produce control cabinets and panels on the basis of technical drawings. You process the cabinets and build in the necessary electronics and wiring. You also check your own work and possibly that of colleagues.

Who Are We

Founded in 1965 in Leiderdorp, Netherlands, Praxis Automation Technology is a market leading manufacturer and supplier of automation, navigation and hybrid propulsion systems for sea going vessels. Our passion for shipping and technology is the drive of our company. We offer high-quality innovative systems that uses the very latest technologies. A key strength is being able to convert the wishes and needs of our clients into tailor-made quality systems. Our company is a trendsetter in sustainable innovations.

We supply our products to international shipyards, ship owners and system integrators and serve them via our selected global network of service and maintenance points. With over 80 employees in the Netherlands and a network of worldwide sales and service locations, Praxis has built a reputation as a solid partner. The high-quality knowledge and experience of our employees is the driving force that pushes us forward. We distinguish ourselves through the involvement of our employees. With an open mind to feedback and teamwork, our company has created an ideal environment to develop your engineering skills.
