

Project Engineer Dynamic Positioning

Are you a technical talent and do you want to strengthen our Engineering team?
Then we are looking for you!

The Job Description

Dynamic Positioning (DP) is a computer-controlled system to automatically maintain a vessel's position and direction by using propellers and thrusters. Our "Dynamic Positioning System" is mainly a software-based system that runs on our own hardware. We are constantly working to further develop the system. We are looking for a Project Engineer to join our Dynamic Positioning Team. Your role is to liaise with the Sales, Production and Innovation departments. You will report to the Project Engineering Manager.

Who Are We

Founded in 1965 in Leiderdorp, Netherlands, Praxis Automation Technology is a market leading manufacturer and supplier of automation, navigation and hybrid propulsion systems for sea going vessels. Our passion for shipping and technology is the drive of our company. We offer high-quality innovative systems that uses the very latest technologies. A key strength is being able to convert the wishes and needs of our Clients into tailor-made quality systems. Our company is a trendsetter in sustainable innovations.

We supply our products to international shipyards, ship owners and system integrators and serve them via our selected global network of service and maintenance points. With over 80 employees in the Netherlands and a network of worldwide sales and service locations, Praxis has built a reputation as a solid partner. The high-quality knowledge and experience of our employees is the driving force that pushes us forward. We distinguish ourselves through the involvement of our employees. With an open mind to feedback and teamwork, our company has created an ideal environment to develop your engineering skills.

Your Responsibilities

- Project Management and engineering from client specification to delivery and sea-trials
- Daily interaction with colleagues from Sales, Design, Production and Innovation departments
- Communicating with Clients about project specific details
- Addressing challenges that might arise during the project
- Generating project specific documentation like design drawings and protocols

- Hardware and software configuration and testing for each system
- Organizing the Factory Acceptance Test (FAT) approval with the Classification Society and the Client
- Commissioning of the systems, either on site or remotely
- After Sales and Customer Support
- Supporting the development of the Dynamic Positioning system in all aspects

Skills And Qualifications

- Technical Bachelor's degree, preferably in automation, electrical or automotive engineering
- A beginner or someone with several years of relevant work experience
- Experience in developing and maintaining good relationships with Clients is a plus
- Affinity with automation, mathematics, physics and programming
- Customer oriented attitude
- Good communication skills
- Ability to travel abroad
- Good analytical skills
- Team player and a positive attitude
- English speaking required

What We Offer

- An international, informal and collegial working atmosphere.
- Enthusiastic colleagues who are always ready to help you
- Competitive salary
- Good secondary employment package
- Training and personal development opportunities
- Pension
- Travel allowance (starting from 10km with a maximum of 75km)
- Holiday allowance of 8% gross and 29 days of holiday
- Possible prospect of a permanent contract
