

Service Engineer

Are you a technical talent and do you want to strengthen our Engineering team?
Then we are looking for you!

The Job Description

As a service engineer you will be responsible for the service and commissioning of automation, navigation and electrical propulsion projects. You will work together with other departments, most notably engineering and innovation. You will report to the Manager Customer Service.

Who Are We

Founded in 1965 in Leiderdorp, Netherlands, Praxis Automation Technology is a market leading manufacturer and supplier of automation, navigation and hybrid propulsion systems for sea going vessels. Our passion for shipping and technology is the drive of our company. We offer high-quality innovative systems that uses the very latest technologies. A key strength is being able to convert the wishes and needs of our clients into tailor-made quality systems. Our company is a trendsetter in sustainable innovations.

We supply our products to international shipyards, ship owners and system integrators and serve them via our selected global network of service and maintenance points. With over 80 employees in the Netherlands and a network of worldwide sales and service locations, Praxis has built a reputation as a solid partner. The high-quality knowledge and experience of our employees is the driving force that pushes us forward. We distinguish ourselves through the involvement of our employees. With an open mind to feedback and teamwork, our company has created an ideal environment to develop your engineering skills.

Your Responsibilities

- Representation of our company on board ships and at customer's locations.
- Troubleshooting on board ships and other installations equipped with Praxis systems
- Commissioning of newly delivered systems in close co-operation with our customers and other suppliers
- Frequent travel to customer's locations in NL and worldwide
- Provide important feedback to our innovation and engineering departments so we can continuously improve our products
- In-house technical support to our customers and internally to other departments
- After an internal training you will be expected to be able to carry out your assignments independently, off course you can always rely on remote support from your colleagues in the office

Skills And Qualifications

- Technical Bachelor's degree or MBO 4, preferably in automation, electrical or automotive engineering
- A beginner or someone with several years of relevant work experience
- Experience in developing and maintaining good relationships with clients is a plus
- Customer oriented attitude
- Good communication skills
- Ability to travel abroad (mostly short trips of about 3-4 days)
- Good analytical skills and a problem-solving approach
- Team player and a positive attitude
- English speaking required

What We Offer

- An international, informal and collegial working atmosphere.
- Enthusiastic colleagues who are always ready to help you
- Competitive salary
- Good secondary employment package
- Training and personal development opportunities
- Pension
- Travel allowance
- Holiday allowance
- Prospect of a permanent contract
