

Technical assembly worker Electric Propulsion

Are you a technical talent and do you like to work with electronics? For the last 2 years Praxis Automation Technology has been developing their own electric Propulsion systems for ships. At the moment we are setting up a new team for the assembly of our new product line. Do you have electro technical skills, like precise work and do you have an eye for detail and quality, then we are looking for you!

We are looking for an enthusiastic new colleague for our new hybrid propulsion team.

The Job descriptions

With a small team, you will be responsible for the assembly of our own designed electric Propulsion system. The system consists of High-Power Inverters, Battery with BMS and custom electric motors. You will be responsible for the assembly of the High-Power Inverter, Battery packs and BMS unit. This is specialist work and must be carried out with great care. Therefore, you must work accordingly to the production manual.

Who Are We

Founded in 1965 in Leiderdorp, Netherlands, Praxis Automation Technology is a market leading manufacturer and supplier of automation, navigation and hybrid propulsion systems for sea going vessels. Our passion for shipping and technology is the drive of our company. We offer high-quality innovative systems that uses the very latest technologies. A key strength is being able to convert the wishes and needs of our clients into tailor-made quality systems. Our company is a trendsetter in sustainable innovations.

We supply our products to international shipyards, ship owners and system integrators and serve them via our selected global network of service and maintenance points. With over 80 employees in the Netherlands and a network of worldwide sales and service locations, Praxis has built a reputation as a solid partner. The high-quality knowledge and experience of our employees is the driving force that pushes us forward. We distinguish ourselves through the involvement of our employees. With an open mind to feedback and teamwork, our company has created an ideal environment to develop your engineering skills.
