

Repair Engineer Electronics

Are you a technical talent and like working with Printed Circuit Boards? Do you have electro-technical skills, like soldering and have SMD component knowledge? If you like to fix electronic parts, then we are looking for you! We are looking for an enthusiastic new colleague for our Hardware Test Department.

The Job Description

We produce about 25.000 electronic parts a year and some of them break down. It is your job to analyze the problem and fix the part. You are responsible for the complete process from incoming repairs to outgoing fixed parts. You will communicate with our clients for the best result, and you will make sure that everything works a 100%. You must have manual soldering skills and SMD components knowledge.

Who Are We

Founded in 1965 in Leiderdorp, Netherlands, Praxis Automation Technology is a market leading manufacturer and supplier of automation, navigation and hybrid propulsion systems for sea going vessels. Our passion for shipping and technology is the drive of our company. We offer high-quality innovative systems that uses the very latest technologies. A key strength is being able to convert the wishes and needs of our clients into tailor-made quality systems. Our company is a trendsetter in sustainable innovations.

We supply our products to international shipyards, ship owners and system integrators and serve them via our selected global network of service and maintenance points. With over 80 employees in the Netherlands and a network of worldwide sales and service locations, Praxis has built a reputation as a solid partner. The high-quality knowledge and experience of our employees is the driving force that pushes us forward. We distinguish ourselves through the involvement of our employees. With an open mind to feedback and teamwork, our company has created an ideal environment to develop your engineering skills.
