

Test Engineer Electronics

Are you a technical talent and like working with Printed Circuit Boards? Do you have electro-technical skills, like soldering and have SMD component knowledge? If you like to fix electronic parts, then we are looking for you! We are looking for an enthusiastic new colleague for our Hardware Test Department.

The Job Description

You are responsible for the quality of our own designed and produced printed circuit boards (PCB). The role involves performing visual inspection of the PCB and a 100% test to check if all the functions of the PCB are working. When a part of the circuit is not working you need to repair it according to IPC guidelines. You must have manual soldering skills and SMD components knowledge. You have the final responsibility of our products before we ship them to our customers.

Who Are We

Founded in 1965 in Leiderdorp, Netherlands, Praxis Automation Technology is a market leading manufacturer and supplier of automation, navigation and hybrid propulsion systems for sea going vessels. Our passion for shipping and technology is the drive of our company. We offer high-quality innovative systems that uses the very latest technologies. A key strength is being able to convert the wishes and needs of our clients into tailor-made quality systems. Our company is a trendsetter in sustainable innovations.

We supply our products to international shipyards, ship owners and system integrators and serve them via our selected global network of service and maintenance points. With over 80 employees in the Netherlands and a network of worldwide sales and service locations, Praxis has built a reputation as a solid partner. The high-quality knowledge and experience of our employees is the driving force that pushes us forward. We distinguish ourselves through the involvement of our employees. With an open mind to feedback and teamwork, our company has created an ideal environment to develop your engineering skills.
